Bianca has a significant skills set for assessment and treatment of a wide variety of speech and language disorders across medical populations, and has worked extensively with the adult acquired brain injury population. Through this she has acquired the therapeutic skills and knowledge necessary for assessment and treatment of cognitive communication, motor speech disorders, language disorders, voice disorders, and dysphagia. In addition Bianca has devoted significant time to researching and utilizing a sensory awareness therapy with the severe acquired brain injury population.

Following graduation, in 2004 with a Masters of Communication Sciences and Disorders-Speech Language Pathology, Bianca worked at London Health Sciences Centre, providing service to the trauma program, critical care, orthopaedic surgery, family medicine, and palliative care programs. She was responsible for completing formal cognitive communication screening and assessments to all trauma patients with a suspected ABI. Additionally, she completed formal aphasia, dysarthria and dysphagia assessments. Bianca also has significant experience providing sensory enhancement therapy with severely injured clients and their families.
